ENERGY STAR® Qualified Models

Standard voltage for all models is 240 VAC single phase power.

†For complete information consult written warranty.

*120 VAC single phase power

**Side water connections

^ATop inlet/outlet water connections; compact models (6U/12U and 20U) may be field converted to side inlet/outlet

Energy Factor ratings shown for Hybrid Electric Heat Pump units are based on operation in the Hybrid mode. Recovery Ratings shown for Hybrid Electric Heat Pump units are based on back up heating element performance.

Most models shipped from the factory with an insulation blanket will have a "B" as the next to last character in the model number. See the "Shipped with Factory Insulation Blanket" section of the table above.

U.S. Craftmaster® Water Heaters reserves the right to make product changes or improvements without prior notice. Dimensions in all charts shown in inches. Dimensions and specifications subject to change without notice in accordance with our policy of continuous product improvement. Some models may not be available in all markets.

(Available in Natural Gas or Propane*)

ENERGY STAR® Qualified Models

†For complete information consult written warranty.

Δ Height dimension is to the top of the draft diverter for all models except Atmospheric Direct-Vent models.

* For propane model change the "N" to "L"

** Atmospheric Direct Vent, PowerFlex® and PowerFlex® Direct models. For Propane model change "N" to "P". Heights shown are to the top of jacket, 40 gallon model requires 67" minimum and 50 gallon model requires 76" minimum vertical clearance for factory provided/required coaxial vent kit. These coaxial vent kits for these models terminates horizontally through a side wall only.

For models shipped from the factory with an insulation blanket there is "B" as the last character in the model number. For example: NG1F3030TB.

U.S. Craftmaster® Water Heaters reserves the right to make product changes or improvements without prior notice. Dimensions in all charts shown in inches.
